

Asset Management Services

E-Auction Services:

We provide complete and dynamic e-auction services (pre-auction, auction and post auction) to sell recurring scrap (ferrous & nonferrous), project leftovers, entire plants, equipment, all types of machineries, complete process line, prime, non-prime steel, hazardous waste, e-waste, coal, D2H bandwidth, sugar, chemicals, uncleared cargoes, closed down large turnkey projects, all types of vehicles etc. with great value addition.

Our ultimate aim is to contribute your bottom line.

Highlights of our services:

- Conversion of assets into the cash flow with great value addition.
- End to end complete transparent services with complete audit trail.
- Category wise huge data base of buyers creates healthy competition.
- Offers competitive bidding environment to maximize realization.
- Bidders can bid from their office itself thus ensuring wider participation.
- Bidders can participate in number of auctions of different locations at the same time.
- Well educated and highly experienced front and back end staff.
- Robust IT infrastructure to handle large number of buyers.

Asset Mapping:

The Companies Act, 1956 mandates Statutory Auditors to report on the physical verification of assets by the management. We offer to undertake asset-mapping activities with our trained and qualified staff across the country.

Scope :

- Techno-commercial data collection.
- Identification and verification of assets.
- Classification and categorization.
- Creation of barcode.
- Test Run.
- Tagging of assets.
- Photograph of asset.
- Final report.

Benefits:

- Helps compliance with Company Act and ICAI rules.
- Third party Verifications of assets improves reliability of process.
- Verification of all assets across all factories within a short span of time.
- Location wise inventory of assets helps asset movement across locations.
- Asset mapping reduces loss through misuse, mismanagement, theft & re-purchase.
- Identification of used and idle assets for depreciation/write off etc.
- Helps to understand the current state of equipment and make replacement decisions.
